

Integrated variable speed 'W' motors

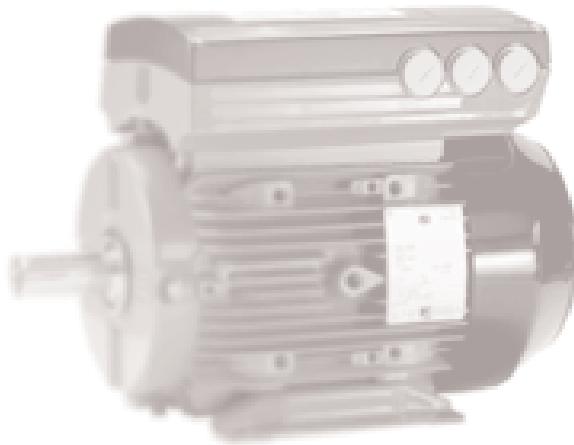

Frames 80 to 132

Variable speed motors

0.55kW to 7.5kW

Brook Crompton

Brook Crompton is a leading manufacturer of electric motors for the global industrial market, with motor solutions which benefit a wide range of customers.

Our products are used in almost every industrial activity including water treatment, building services, chemical/petrochemicals, general processing and manufacturing where they drive fans, pumps, compressors and conveyors, amongst other things.

Brook Crompton incorporates many well known names including Brook Motors, Crompton Parkinson, Electrodrives, Newman, Bull Electric and Hawker Siddeley Electric Motors.

We have extensive stocks of motors around the world, backed-up by a network of distributors, ensuring excellent local support wherever needed.

Quality assurance

Stringent quality procedures are observed from first design to finished product in accordance with the ISO9001 documented quality systems.

Variable speed motor range

Brook Crompton's fully integrated variable speed 'W' motor (VSM), offers the reliability, low noise and energy saving characteristics you've come to expect from the 'W' range, but with added technology.

The VSM's perfectly matched motor and inverter has been designed to improve the performance of machinery and mechanical handling systems as well as increase the efficiency and reduce the cost of fan and pump systems.

The VSM package fits within the same envelope as the equivalent 'W' motor, and has the same facility for mounting the terminal box (now the inverter) on the top or the side of the motor. This allows for considerable space-saving and flexibility, for example, in fitting the motor to existing

designs and installations. The close electrical and mechanical coupling of the inverter and motor means there is no need for extra cabling, so you can avoid EMC problems and voltage spikes. It's efficient, robust and economical - in short - everything you'd expect from a motor with the 'W' symbol - and its fast user-friendly programming means that installation is simple and fast.

Whether you need fine speed control, rapid response and acceleration, energy efficiency or low noise operation, you'll find it all in the VSM 'W' package.

Efficiency

Brook Crompton are an approved manufacturer of ac electric motors within the UK Government's Enhanced Capital Allowance (ECA) scheme.

A wide range of single and multi-speed motors are included on the UK Energy Technology List in addition to the VSM. Please check the ECA scheme website: www.eca.gov.uk at time of purchase for current listing.

VSM benefits and options

Cost saving

- ◆ no screened power cable required
- ◆ no cable length limitation, hence no cable chokes required

Complete flexibility

- ◆ option available of three inverter positions

Space saving

- ◆ no panel space required
- ◆ VSM is the same size as a standard 'W' motor

Variable speed motor replacing mechanical variator

VSM mounted controls options

A variety of components can be locally mounted and fully wired to a 3-station die cast aluminium enclosure to provide control at the motor itself. Choose from any 3 of the following:

- ◆ stop push button
- ◆ start push button
- ◆ speed control potentiometer
- ◆ forward/reverse selector switch
- ◆ local/remote selector switch
- ◆ indicator lamp
- ◆ low/high speed selector switch
- ◆ manual/automatic selector switch

Mechanical options

The VSM can be fitted with all the normal motor extras. It can also offer customised solutions, for example:

- ◆ quick release shaft system - paint paddle mixers etc
- ◆ specified paint colours and special coatings
- ◆ special shafts

Complete variable speed solutions

We can offer completely engineered variable speed motor systems to provide specific customer solutions from one single source.

Typical applications include:

- ◆ pumps
- ◆ compressors
- ◆ fans
- ◆ mixers
- ◆ conveyors

Typically, a matched package of equipment may consist of:

- ◆ VSMs
- ◆ complete control panel
- ◆ customer interfacing
- ◆ feedback device

Enclosure options

- ◆ IP protection ratings to suit customer requirements
- ◆ cost-effective pressed or sheet steel
- ◆ polycarbonate, polyester, stainless steel etc
- ◆ specially designed and fabricated to specification

Control options

- ◆ open loop - local or remote operation
- ◆ closed loop process PID control - pressure/ flow/temperature
- ◆ closed loop speed control
- ◆ single or multi-motor control - eg duty standby/assist/share
- ◆ energy saving 'sleep' mode at zero demand
- ◆ analogue, digital, RS485 or Profibus control
- ◆ complete switchgear, control and protection equipment
- ◆ simple control components - stop, start, potentiometer, lamps etc
- ◆ PLCs, intelligent HMI and operator interfaces with customised menus
- ◆ sensors and transducers - 0.10V, 4-20mA, pressure, flow, temperature etc
- ◆ remote control stations

Specifications

Technical data

Standards

- ◆ Safety: EN60146, EN61800-2, EN50178, EN60204, UL508
- ◆ EMC: EN61800-3, EN50081, EN50082

Protection

- ◆ In-built thermal overload protection of motor and electronics
- ◆ In-built protection against missing phase, under/overvoltage, overcurrent and voltage transients

Mains supply

- ◆ 380-480 volts, ±10%
- ◆ 50-60Hz supply frequency
- ◆ Maximum imbalance ±2% of rated supply voltage
- ◆ Power factor/cos Ø 0.881/1.0 at rated load
- ◆ 1 time/2 min switches on supply input
- ◆ 4mm² power terminals

Control characteristics

- ◆ 0-132Hz frequency range
- ◆ 0.1% resolution on output frequency
- ◆ Max 40m/sec system response time

Switching frequency

- ◆ Temperature dependant - variable (can be fixed)

Torque characteristics

- ◆ Starting/overload 160% for 1 minute
- ◆ Starting 200% for 5 seconds
- ◆ Top mounted aluminium inverter box, black aluminium lid, standard inverter fitted with 3 plastic blind plugs
- ◆ Foot mounted (B3), detachable steel feet
- ◆ Voltage 380-480 volts ±10%
- ◆ IP55 protection
- ◆ Ambient temperature 40°C, RFI class 1A, clockwise rotation
- ◆ IEC60034, BS4999 standards, DIN standards, CE marked
- ◆ 35/40 tonne carbon steel shaft, shaft drilled for brake kit
- ◆ Keyway closed profile key - double round end, fitted if standard extension
- ◆ water flinger (frames 100+), bearing location and NDE reduced (R) balance (ISO 2373), plated fasteners, class F insulation

Number of programmable inputs/outputs

- ◆ 4 digital inputs
- ◆ 1 pulse input
- ◆ 1 analogue voltage input
- ◆ 1 digital/analogue output
- ◆ 7 preset speeds

External conditions

- ◆ IP55 enclosure
- ◆ 2.5g vibration test (IEC 68)
- ◆ 93% (+2%, -3%) max storage relative humidity
- ◆ Max 40°C (over 24 hours average) ambient temperature without derating
- ◆ Min -10°C ambient temperature
- ◆ -25 +65/70°C during storage
- ◆ Max 1000m above sea level before derating

Standard specification

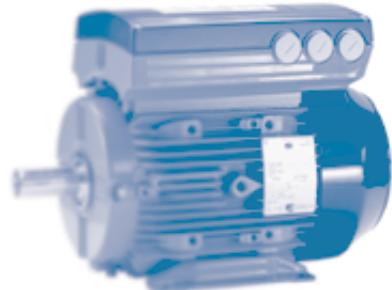

- ◆ Totally enclosed fan ventilated (TEFV) polypropylene fan, black steel fan cover
- ◆ Anodised aluminium riveted nameplate
- ◆ Water-based paint - water blue RAL 5021

Optional Features

- ◆ IP66 enclosure
- ◆ Forced ventilation
- ◆ Special bearings and locations
- ◆ Standard and non-standard mountings
- ◆ Special shafts
- ◆ Profibus version
- ◆ RFI class 1B
- ◆ Customer factory settings of inverter parameters
- ◆ Mechanical brakes

Accessories

- ◆ Potentiometer in gland
- ◆ Local operating pad (LOP)
- ◆ Local control panel (parameter change) - remote kit - gland plug kit
- ◆ RS485/RS232 converter
- ◆ Dialogue software
- ◆ Encoders

For more detailed information including derating, see the Design Guides Manual, ref 9804

Motor selection

From the duty and speed requirements in the top section, find the relevant vertical column under Totally Enclosed Fan Ventilated (TEFV) and look for your torque or kW needs.

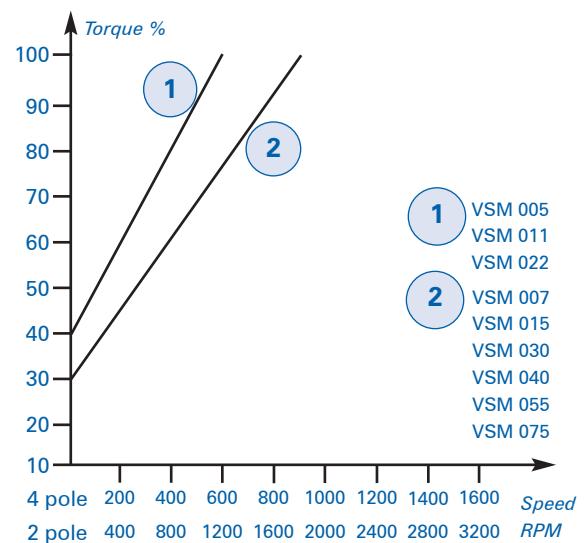

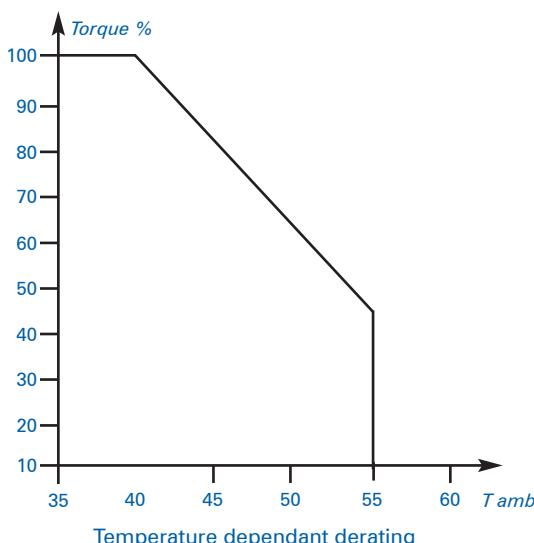

Next, look to the left hand side of the table for the VSM and motor references, noting the current, and thereby the supply protection needed.

If the resulting VSM is physically too large for your drive requirements, and you need constant torque, refer to the force ventilated alternative columns.

50Hz (3000 and 1500 rpm) and 60Hz (3600 and 1800 rpm) 380/480V 3-phase 40°C ambient				Cooling									IEC416 force ventilated

Terminal arrangement

X101 terminal block for analogue/digital control signals		
Terminal no	Function	Example
1	Analogue input (0-20mA)	Feedback signal
2	Analogue (0-10V)/digital input 2	Speed reference
3	Digital input (or pulse) 3	Reset
4	Digital input (or precise stop) 4	Start
5	Digital input (other) 5	Jog (fixed speed)
6	24V dc supply for digital inputs (max 150 mA)	
7	10V dc supply for potentiometer (max 15 mA)	
8	OV for terminals 1-7 and 9	
9	Analogue (0-20 mA)/digital output	Fault indication

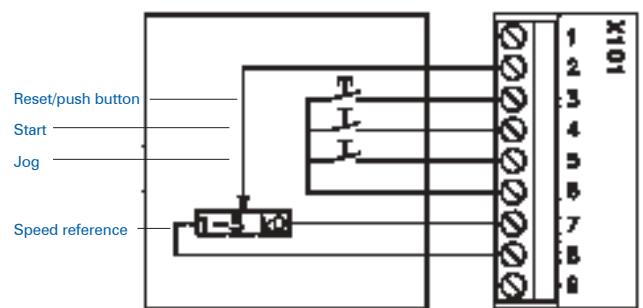

Terminal arrangement

X100 terminal block for data communication		
Terminal no	Function	
1	P RS 485	For connection to bus or PC
2	N RS 485	For connection to bus or PC
3	5V dc	Supply for RS 485 bus
4	0V dc	Supply for RS 485 bus

LED 300-304		
(For Profibus versions refer to Profibus manual from Brook Crompton)		
LED 300	Red	Fault trip
LED 301	Yellow	Warning
LED 302	Green	Power on
LED 303-304		Communication

Connection diagram - factory setting	
Reset	To be closed short time for resetting fault trips
Start	To be closed for changing to run mode
Jog	Will run at fixed speed while closed (10Hz)
Speed ref	(0-10V) determines speed while in run mode

Connection diagram

Applications/benefits

Pumps and compressors

- ◆ High starting torque
- ◆ PID regulator
- ◆ Good speed holding
- ◆ 4-20mA feedback
- ◆ 0-10V feedback
- ◆ IP55 - IP66 optional
- ◆ 3 variable torque settings
- ◆ 1 constant torque setting
- ◆ Sleep mode - energy saving
- ◆ Multi-pump

◆ Pump application
◆ Preset speed control

◆ Gearbox/conveyor drive
◆ LOP control

Material handling

- ◆ Constant torque setting
- ◆ Compact size
- ◆ Profibus - other protocols on request
- ◆ Step load response good
- ◆ Mechanical brake option available
- ◆ Force ventilated - when required
- ◆ DC and ac braking as standard features

System capability

- ◆ Multiple pump control
- ◆ Sleep mode
 - for energy saving
- ◆ Water booster set system

◆ Waste water application
◆ Open loop control

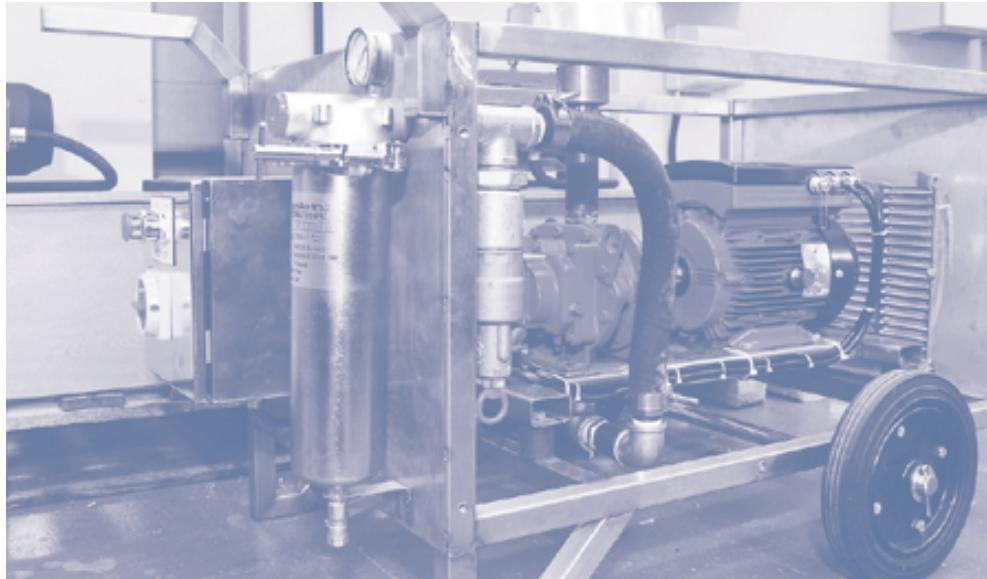

◆ Pump application
◆ Closed loop control
◆ Constant pressure regulation

Applications

Variable torque

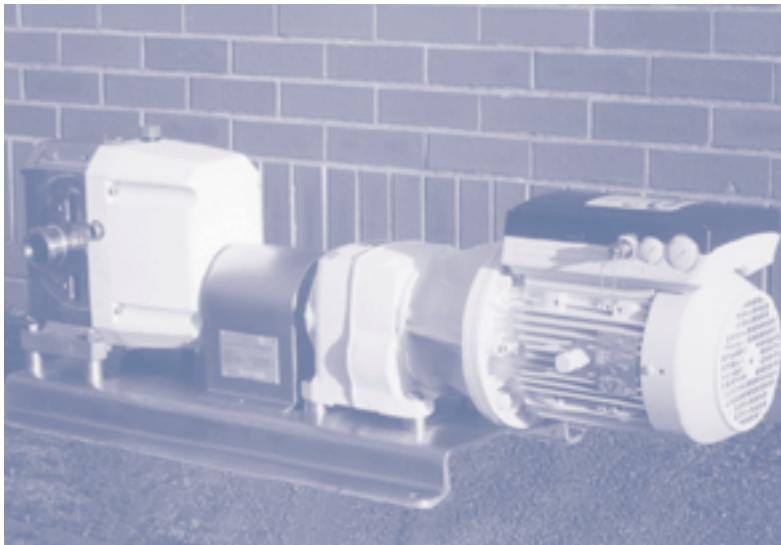

For pumps, fans and mixers, the integrated VSM offers reduced mechanical controls and an energy efficient and low noise motor

Mobile pump unit

Constant torque

For conveyors, centrifuges and compressors, the package offers a wide and accurate range of speeds, combined with a high torque.

Gearbox/pump unit

Accessories

Potentiometer gland

- ◆ speed control
- ◆ IP66
- ◆ order ref 176H9205

Remote LCP mounting kit

- ◆ allows LCP to be mounted in separate panel
- ◆ Order ref: 175NO160

LOP

- ◆ start/stop
- ◆ speed control
- ◆ jog or reset
- ◆ order ref: 175NO128

LCP and direct cable

- ◆ programming tool
- ◆ start, stop
- ◆ speed control
- ◆ connection with open lid
- ◆ order ref: (LCP) 175NO131 (Cable)
175NO165

LCP and plug kit

- ◆ programming tool
- ◆ start/stop
- ◆ speed control
- ◆ connection with lid closed

Control box

- ◆ start/stop
- ◆ speed control
- ◆ forward/reverse
- ◆ switch if required
- ◆ other controls available on request

Notes

Rotating Electrical Machines
